

Cloud Fax

Paper-less. Phone-less. Hassle-less. Get the fax from anywhere your email or web browser takes you.

Fax is a technology that's a long way from meeting its end, and it's used extensively in industries such as financial services, healthcare, real estate and legal affairs.

But the problem with traditional fax technology is that it is physical. There's a machine, a phone line, toner, paper and maintenance. Further, you have to face the security and privacy risks that come from using a single device for multiple people in a professional setting—where sensitive information is frequently displayed for all to see. Who hasn't left copies of their driver license, social security card, and loan application on the office fax machine at least once?

Our Cloud Fax solution can finally put to rest the noisy, aging machine churning out fax-send reports behind the front reception desk. With Cloud Fax, you can:

- Send and receive faxes online from work, home or on the road—all you need is an Internet connection
- Eliminate the need for a physical fax machine, a second phone line, and paper and toner usage
- Save money on long distance with toll-free faxing anywhere in North America
- Get faxes delivered straight to your inbox or to an online console accessible from virtually anywhere
- Go mobile and easily preview faxes on your handheld device

One Number, Many Results

Cloud Fax enables users to securely send faxes from an online console, and receive faxes as email attachments or to their online console. Whereas traditional faxes are sent and received through a phone line and delivered by a physical fax machine, Cloud Fax can receive faxes online. With Cloud Fax, you can go green and access fax documents from anywhere with an Internet connection.

Save Money

- Reduce paper and toner consumption
- Save on long-distance costs
- No dedicated fax line required no more busy signals
- No fax machine maintenance

Stay Secure

- Faxes are received directly to an inbox vs. lying around on a fax machine
- Included spam filter—block known numbers
- 30-day archiving of received faxes

Save Time

- No need to monitor a fax machine
- Send faxes immediately. No need to wait until you are in the office
- Manage your faxes online. No more paper
- Send faxes once to multiple contacts

A Better Way to Fax

Cloud Fax provides you with the mobility, security and reassurance that your fax communications are reaching their intended recipients. If you:

- Use a fax machine to communicate with customers, suppliers and vendors
- Are looking for a more efficient and secure way to store faxes
- Have a mobile workforce that needs to send and receive faxes while on the go
- Want to go green with an environmentally friendly and more cost-effective solution

Cloud Fax can also simplify your work life. With the following useful features, you'll be able to enhance both personal and business information privacy and confidentiality, with auditable logs that can be used for analysis later on if data goes missing:

- Easy to use, can be online quickly
- Auto resend and delivery notifications
- Call logs track all incoming and outgoing faxes and store digital images of files for later access
